Selenium
Project

Selenium Project:

Website: https://demostore.x-cart.com/

Tests needed:

1. Test add to cart from homepage.
   (Create 2 or 3 test cases to make sure that add to cart is working as expected)
2. Search bar.
   (Create 2 or 3 test cases to make sure that the search bar is working properly)
3. Change the currency from the top right corner of the screen.
   (Create 2 or 3 test cases to make sure that the currency conversion rate is updated successfully)
4. Next to add to cart button there is "Add to comparison" button.
   (Create 2 or 3 test cases to make sure that the comparison between 2 products is working as expected)

- There are packages for every Test includes the test cases.
- This project uses (add extent reports functionality, maven surefire to start test from CMD, and the page factory design pattern).
- The Reports and Screenshots folders is created in the same folder where the project folder.
